Cook What You Have!

Pantry Eatery is a more efficient way to search and find meals to make based on what they currently have in their kitchen to reduce the amount of time spent doing research, reduce time in grocery stores and reduce food waste.

The Pantry Eatery app will be available on android and IOS. Upon downloading, the will be required to either login using a previous account or sign up.

## PANTRY

Adding Feature

The consumer will keep a running list of what they have in their pantry and kitchen. This screen allows the user to add any new items to their list. They will search and add what is currently available in their refrigerator and pantry.

## PANTRY

Editing feature

When the consumer is ready to cook a meal they will simply generate recipes from the database based on what they have in their kitchen. They will be able to sort through the list based on the type of meal they are seeking (breakfast, lunch, dinner, snack, dessert, etc.).

## RECIPES

The user will be given a full list of recipes to choose from based on the items they have listed in their pantry. They will be able to search through the recipes to see if a recipe they prefer has been generated. Once a recipe is selected, the user will be given a full ingredient list along with step by step directions to cook the recipe.
